

MG COMET EV

“THE NO-NONSENSE CAR”

ABOUT US

A million speeding lines, a 94 year old legacy, a look out for the future, our fingers on the pulse of innovation, poetic particles in constant motion, we are shapeshifting and transforming constantly. We have broken land speed records, we are a British fashion icon but also pop culture's best mate. There's just no staying idle for us. The greatest thing we did yesterday is so yesterday. And we'll be damned, if we can't speed away from it just like a flash of blinding light, speeding and transforming. Because while we believe that what we are today is great, we know, tomorrow will be greater.

We're MG. Welcome to the world of motoring.

COMET *EV*

THE NO-NONSENSE CAR

Turning Radius

4.2 m
